

VF600 Facility Filter

WATER FILTRATION

The VF600 is a water filtration system for larger scale applications. It has been implemented across the world in businesses, schools, clinics, and community centers. It can provide more than 50,000 liters (13,208 gallons) of safe drinking water per day. The VF600 has virtually no maintenance due to the automated backflushing function which ensures longevity and saves time.

KEY FEATURES

- 💧 **Highly Effective** — 0.1 micron absolute filters protect against bacteria, protozoa, and cysts
- 💧 **Simple to Use** — Fresh water at the turn of a valve, unit automatically cleans itself
- 💧 **Fast Flow** — Can supply more than 50,000 liters (1,320 gallons) of water per day
- 💧 **Long Lasting** — Filter cartridges are rated to last for 7-10 years with proper maintenance
- 💧 **Unique Design** — Cartridges can be backflushed without being removed
- 💧 **Seamless Installation** — Incorporates directly into water delivery systems already in use
- 💧 **No Maintenance** — Set and forget system: backflushing to clean is completed automatically
- 💧 **Versatile Application** — Attaches to water tanks, cisterns, or municipal sources

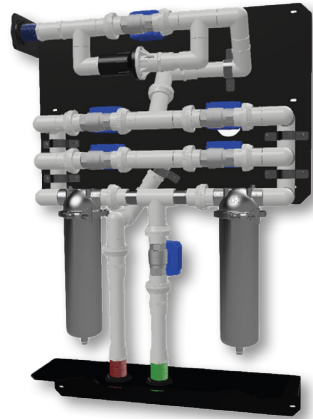

BENEFITS

- 💧 **Hassle Free** — No need to remove components or constantly replace parts. Backflushing is done automatically for you, utilizing filtered water to quickly clean your full filter system.
- 💧 **Durable and Dependable** — The VF600 system is designed to be in use for many years. The only part that needs to be replaced after years of use is the filter cartridge and this is easily done by simply unscrewing and replacing it.
