

WATER TESTING

Aquagenx

Alert Test (CBT EC+TC)

Adventure with confidence—take the Aquagenx Alert Water Test (E. coli & Total Coliform - P/A - CBT) on your next trip! This portable water test detects E. coli and Total Coliforms in a 100 mL sample. If contaminants are present, the water turns blue, giving you fast, clear results. Stay safe in the wild by investing in your water quality today!

Key Features

- 💧 Meets WHO guidelines for drinking water quality
- 💧 Protects against E. coli and Total Coliforms
- 💧 No electricity or labs required

How to Use:

1. Collect 100 mL sample.
2. Add powder growth medium to sample.
3. Incubate 20-48 hours.
4. Score EC test results in ambient light. Score TC test results under UV light in dark environment.
5. Decontaminate sample.

Why choose Aquagenx Alert Kit (CBT EC+TC)?

Variable Temperatures Accepted — Constant temperature control of the test is not required in order to reach efficient results.

No Labs Required — The Aquagenx Alert Kit (CBT EC+TC) does not require electricity in order to provide results and does not need to be sent in to a lab.

Simple and Fast — This water test is simple to use, in just a few steps and 1-2 days, you'll have your water drinking quality results.
